

THE TOWN OF MONSARAZ

 114  N 38° 25' 039" W 7° 23' 001" (dock)

The fortified town of Monsaraz is built on a rocky outcrop that offers a magnificent view over the natural landscape. The origin of its name is not certain; however, mon-xarás – “monte-xaras” (rock rose hill) -, is a poetic image that fits the history and charm of this place perfectly.

This old place was once inhabited by Romans and Arabs. In fact, its border gave it a proud guardian role.

The first charter was given to the town by King Afonso III. It established the boundaries of the original medieval period as well as the crown land, in other words, the land that belonged to the king. These lands gave the name to Reguengos de Monsaraz.
